DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 101 & § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. 35 U.S.C. 101 reads as follows:
Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
4. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim, as recited, is an improper hybrid of two of the four separate statutory classes of invention (apparatus, and method of using it). MPEP 2173.05(p) II.
5. Claim 12 is additionally rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim, as recited, is an improper hybrid of two of the four separate statutory classes of invention (apparatus/machine, and process/method of using it). MPEP 2173.05(p) II.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 2877

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,120,950. Although the conflicting claims are not identical, they are not patentably distinct from each other because a product (any one mark of the repeating two-level structure, e.g., '950 Fig. 2A, Fig. 5 process D) of the process claimed in '950 would meet the instant invention. ('950 Fig. 6 shows that the phase difference at λ between the two levels (Fig. 5 process D) would be π ; and therefore a non-design wavelength λ' would not be π nor an integer multiple, as recited in instant claim 1 lines 15-18). Dependent claims are mere obvious variations of embodiments either well known, taught, or disclosed in the reference (e.g., reflective vs. transmissive embodiments).
